High Quality Custom Engineered Bi-fold Doors

**Designed by pilots,
preferred by pilots!**

Whether you are building new or retrofitting an existing building, Diamond Bi-Fold Doors are the logical door choice for your hangar. With decades of proven industry experience, pilots have come to trust the quality and reliability of a Diamond Door. Since 1998 Diamond Doors has specialized exclusively in the design and fabrication of the industry's best bi-fold door. And we think you'll agree!

With an extensive background in aviation and many of our staff recreational pilots and aviation enthusiast themselves, Diamond Doors understands what's important to today's aircraft owners and pilots.

Safe Operation

Operate your door with confidence knowing it is built using proven components and designed with years of experience with numerous safety features built into its design.

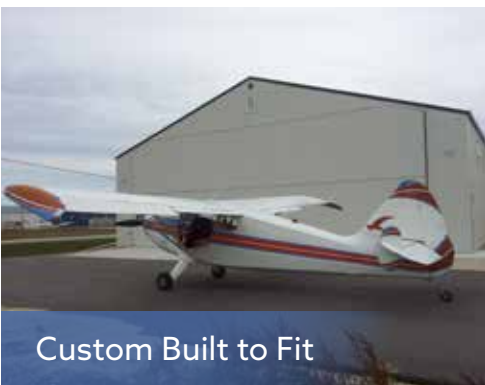

Durable

By utilizing quality components, a high strength steel frame and a drive design with minimal moving parts, you can expect years of reliable performance from a Diamond Door.

Secure

Doors can be secured with ease using the maintenance free locking system, available in single lever or electric auto-lock.

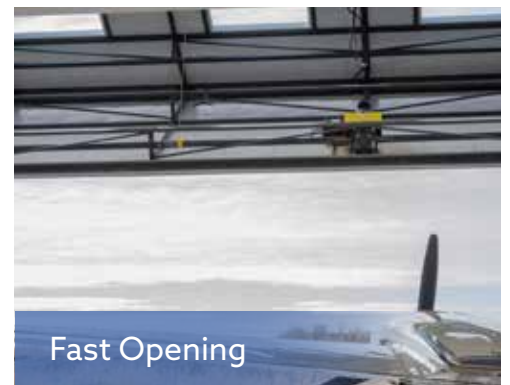

Custom Built to Fit

Don't settle for less! Diamond Doors are custom built allowing you to maximize the possibilities of your building. Don't make your building fit the door, let the door fit your building!

Battery Powered Opener

Doors can be equipped with a battery powered DC opener, ideal for remote locations where line power is not available.

Fast Opening

Similar to your aircraft, Diamond Doors are built strong yet light, providing the fastest opening speeds on the market, with additional speed upgrades available to suit your application.

Door Features

Diamond Doors come well equipped with a host of standard features and can be easily customized to suit your specific application. For more information please visit our website or contact us today!
